

# CERTIFIED EMPLOYEE FINDER

2022

Trained and Screened Workers with  
EPA and OSHA Certifications in  
Health, Safety, and  
Environmental  
Remediation

Brownfields-toolbox.org is sponsored  
by the Hazardous Materials Training  
and Research Institute (HMTRI) of  
Eastern Iowa Community Colleges  
under Cooperative Agreement with the  
U.S. Environmental Protection Agency

# Introduction

EPA Brownfields Job Training (BJT) grant recipients submitted their program information to include:

- Program contact information
- Curriculum offered to students
- Certificates and certifications students will possess upon graduation
- Life skills taught

This document is a compilation of their information.

---

---

**The purpose of this document is  
to assist employers in finding  
workers with the specific  
credentials needed for employment.**

---

---

For further information about a specific program, contact the person listed.

Should you need to update your organization's information in this document, please email Steve Fenton at [sfenton103@aol.com](mailto:sfenton103@aol.com).

Job training programs are listed first in alphabetical order by state, followed by cities within each state.

# COLORADO

## LAS ANIMAS

### Colorado Department of Local Affairs

in partnership with Bent County Development Foundation

332 Ambassador Thompson Bd  
 Las Animas Colorado 81057  
 Website: [cdola.colorado.gov](http://cdola.colorado.gov)  
 65 Civic Avenue

Contact(s)	Cassy Westmoreland, 303.396.9944, <a href="mailto:cassy.westmoreland@state.co.us">cassy.westmoreland@state.co.us</a> <a href="mailto:Sammie George, 719-456-0452, sammie.george@bentcounty.org">Sammie George, 719-456-0452, sammie.george@bentcounty.org</a>
Certificates & Technical Curriculum Supported by EPA	<p><b><u>Curriculum One/Asbestos Remediation Program:</u></b>          Curriculum is geared towards Brownfields assessment and cleanup, mainly focusing on asbestos remediation. The presence of a Fort Lyon EWDJT program will create needed vocational and employment opportunities, increasing the number of locally trained technicians. Brownfields assessment and cleanup, focusing on asbestos remediation, and wastewater treatment. Fort Lyon has a vast array of Brownfields sites, with asbestos as the primary hazardous material present. We have been working with the EPA since 2017 to assess and clean these sites, and we plan to continue this work for the foreseeable future, as funding allows.</p> <p><b><u>Curriculum Two/CDL Program:</u></b>          Fort Lyon hosts a tri-county regional transit system that could complement the stated need for Commercial Driver's Licenses (CDLs) for transporting hazardous materials. If funded, the Fort Lyon EWDJT program will leverage available infrastructure to provide hands on training to participants through contracted trainers as overseen by an Advisory Board made of local experts, trainers, and employers to ensure successful graduate placement. Curriculum Two/ CDL Program will leverage the existing capacity to study for and test to receive CDLs hazardous waste removal through the Bent County transit system in response to employer need. The transit system serves the entire LAV and was created to connect SRC residents to the mental/behavioral/medical care providers off campus. The transit system will work with DOLA, BCDF, &amp; SECO SBI to provide training opportunities to participants as well as provide funding for training stipends, in addition to the EPA EWDJT funding. EWDJT funds will support training, physical and vision</p>

	<p>screening, and certification costs of the CDL. EWDJT staff will track which employment opportunities require a CDL to transport hazardous material to ensure program graduates meet available employment requirements, ensuring successful placement.</p> <p><b><u>Curriculum Two/Wastewater Management Training Program:</u></b>          Brownfields assessment also focuses on wastewater treatment. All the local wastewater treatment facilities partner with Colorado Rural Water Association (CRWA) to conduct the necessary training for staff. To avoid duplication, we utilize CWRA’s training infrastructure to complete training for the Fort Lyon EWDJT as well. The Fort Lyon EWDJT program will leverage the wastewater treatment facility onsite to offer trainings through the CWRA as dictated by local employer demand. This training will assist with the placement target of general technicians for city or county-owned wastewater facilities and allows the Fort Lyon EWDJT to meet ongoing local employer needs by utilizing local and trusted expertise.</p>
<p>Additional Life Skills &amp; Student Services Provided</p>	<p><b><u>Wastewater/Water Systems curriculum expansion:</u></b>          Discussions with CRWA (<a href="#">Colorado Rural Water Association</a>) are already forming program expansion. Deciding to grow from a 2-week wastewater training course into further advanced wastewater training &amp; programs for wastewater management and water systems. Also discussing expanding into an apprenticeship program concerning wastewater management and water systems.</p> <p><b><u>Additional Life Skills:</u></b>  <a href="#">SECO SBI</a> will be housed on the Fort Lyon campus by early Spring 2022 and is assisting BCDF and DOLA with EWDJT program management and implementation. There is opportunity for EWDJT program graduates to gain business soft skills thru the SECO SBI, resume building, computer literacy webinars, incubation of businesses they may form after training(s), and gain further business consulting assistance onsite. There is also a current collaboration with <a href="#">SECO SBDC</a>, <a href="#">CU-Denver</a>, and SECO SBI to house a Rural High-Tech Hub on the Fort Lyon campus. EWDJT graduates can gain data science certification &amp; further data science course knowledge if they choose.</p>

Certificates & Technical Curriculum Supported by EPA	<ul style="list-style-type: none"> <li>• 40-hour HAZWOPER</li> <li>• OSHA 10-hour</li> <li>• First Aid/ CPR</li> <li>• Ecological Restoration</li> <li>• Green Infrastructure</li> </ul>
Additional Life Skills & Student Services Provided	<p>Program is offered in partnership with Greencorps Chicago. A case manager supports trainees with wrap-around social services throughout the program by mentoring and connecting them with the resources they need to be successful. In addition to the technical training components, trainees receive 90 hours of career guidance and professional development training funded by CDOT and other leveraged resources. Training includes workshops, group activities, field trips and individual projects related to professional development and career advancement. Workshop topics include Conflict Resolution, Time Management, Critical Thinking, Cultural Competency, Sexual Harassment, Goal Setting, Financial Literacy, Resumes, Mock Interviews, Networking, Job Search, Internet access, email accounts, attachments, Word, and Excel. This component meets the basic educational needs of individuals entering the environmental remediation, horticulture, and other green industries. Following completion of the program, a placement coordinator works to identify appropriate placement matches and continues with post placement follow-up addressing any workplace issues that may arise. □ Leveraged additional technical training includes Solar Panel Installation, Chicago Wilderness Prescription Burn, Brush Pile Burn Safety, Urban Forestry, and Pesticide Application Worker.</p>

# INDIANA

## INDIANAPOLIS

Contact(s)	Donald Romancak, 440.328.2323, <a href="mailto:dromancak@loraincounty.us">dromancak@loraincounty.us</a>
Certificates & Technical Curriculum Supported by EPA	<p>The two-semester Lorain County Environmental Technician Training program is offered to all students enrolled in the Lorain County EWDJT project. The program was developed with input from employers in the environmental remediation and water/ wastewater treatment industries. It prepares students for entry- to mid-level employment and focuses on HAZWOPER, general safety, hazardous materials handling, safety equipment, first aid and CPR, and working in confined spaces.</p> <p>All these topics are relevant and address stated employer needs. Students will complete 162 contact hours of training and earn 10 semester credit hours from Lorain County Community College. Students spend 7.5 hours a day, 5 days a week, for 5 weeks, in the program. Shortly after completing the main courses there will be a half day scheduled to complete the First Aid / CPR course.</p> <p>Courses have been built to OSHA standards. Federal OSHA certifications earned by program graduates help ensure successful employment in environmental remediation occupations. The 10 earned credit hours enable students to strongly consider completing additional environmental remediation courses that may result in a certificate or associate degree. Training programs operated by LCCC and Lorain County Joint Vocational School incorporate sustainable practices, recycling of materials and proper disposal of waste materials.</p>
Additional Life Skills & Student Services Provided	Contact for information.
